make-up & skincare for men

Fontana Contarini Uomo Liquid Foundation for Men

- This is a great foundation designed especially for men by Fontana Contarini Uomo of Italy.
- It hydrates and nourishes your skin and is ideal in winter or summer weather conditions. It helps to even out your skintone with a light, non-greasy coverage to achieve a discreet and natural finish.
- Fontana Contarini Uomo Liquid Foundation also counters the signs of ageing and acts as a barrier to pollutants. Available in Light (5) or Medium (6) skintones.

Application instructions

1. Exfoliate and moisturise your face
2. Pump a small amount of foundation either onto your fingertip or a sponge wedge. It may appear darker than expected when you squeeze it from the tube, you will find that it goes on really naturally and gives the merest hint of colour which will have people telling you how healthy you look!
3. Lightly rub it into the face, ensuring that you are applying it evenly. Make sure that you take extra care around creases, and around the edges of your face. You don't want a line where the foundation stops – better to blend it out smoothly. It is only very light foundation, much closer to a tinted moisturiser really, so this should be quite easy to achieve.
4. If you want to achieve an even lighter finish then blend the foundation with moisturiser before applying
5. The idea is that you don't look like you're wearing makeup – rather that you have really nice skin and look healthy.
